

## Description

The S&P/TSX North American Preferred Stock Index is designed to measure the preferred share markets in Canada and the U.S. Preferred stocks pay dividends at a specified rate and receive preference over common stocks in terms of dividend payments and liquidation of assets.

## Methodology Construction

- **Universe.** The S&P/TSX North American Preferred Stock Index consists of a 50% weighting in the S&P/TSX Preferred Share Index [CAD] and a 50% weighting in the S&P U.S. Preferred Stock Index at each quarterly index rebalancing.
- **Types of Issuance.**
  - > Eligible preferred shares within the S&P/TSX Preferred Share Index [CAD] include floating and fixed-rate preferreds, cumulative and non-cumulative preferreds, preferred shares with a callable or conversion feature, and trust preferreds. Split preferreds, which are packaged securities linked to baskets of shares, are not included.
  - > Eligible preferred stocks within the S&P U.S. Preferred Stock Index include floating, variable and fixed-rate preferreds, cumulative and non-cumulative preferreds, preferred stocks with a callable or conversion feature, and trust preferreds. Trust preferreds that are issued by a company to meet its capital requirements and that carry a brand name or moniker are also included.
- **Eligibility Market Cap.** Preferred shares are eligible for the S&P/TSX Preferred Share Index [CAD] if they have a total market cap of more than CAD 100 million as of the rebalancing reference date [based on the volume-weighted average price [VWAP] over the last three trading days of the month-end prior to the quarterly review] are eligible. For the S&P U.S. Preferred Stock Index, preferred stocks with a market cap greater than USD 100 million are eligible.
- **Currency Hedging.** Within the S&P/TSX North American Preferred Stock Index, to eliminate U.S. dollar currency exposure from the S&P U.S. Preferred Stock Index, the U.S. dollar is hedged back to Canadian dollars using beginning-of-the-period balances and rolling one-month forward contracts.
- **Maturity or Conversion Schedule.** Preferred stocks that do not have a mandatory conversion or scheduled maturity within the next 12 months are eligible.
- **Maximum Weight Per Issuer.** The S&P/TSX Preferred Share Index [CAD] and the S&P U.S. Preferred Stock Index do not limit the number of preferred stocks issued by a single company, but there is a maximum weight of 10% per issuer for each index. All eligible securities for an issuer are included in each of these indices, with the aggregate weight capped on a pro rata basis to a maximum of 10% of each index's market cap.

## Quick Facts

WEIGHTING METHOD	Capped
REBALANCING FREQUENCY	Quarterly, after the close on the third Friday of January, April, July and October
CALCULATION FREQUENCY	Real time
CALCULATION CURRENCIES	CAD
LAUNCH DATE	August 16, 2010
